

Here I can make a new repository, but I already have made one named PLEASE-WORK locally. I click publish repository to actually make the change on github.

Here I committed changes to the main branch

Here I made a pull request to merge my branch with main

base: main ← compare: testing

✖ Can't automatically merge. Don't worry, you can still create the pull request.

Update testing.html

No local changes

There are no uncommitted changes in this repository. Here are some friendly suggestions for what to do next.

Push commits to the origin remote

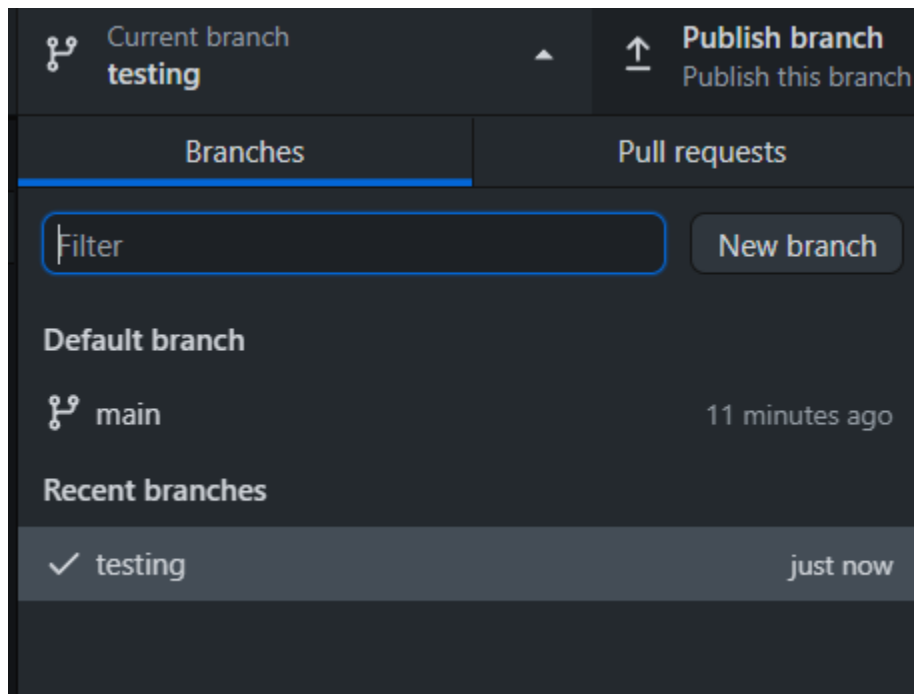

You have 1 local commit waiting to be pushed to GitHub.

Always available in the toolbar when there are local commits waiting to be pushed or

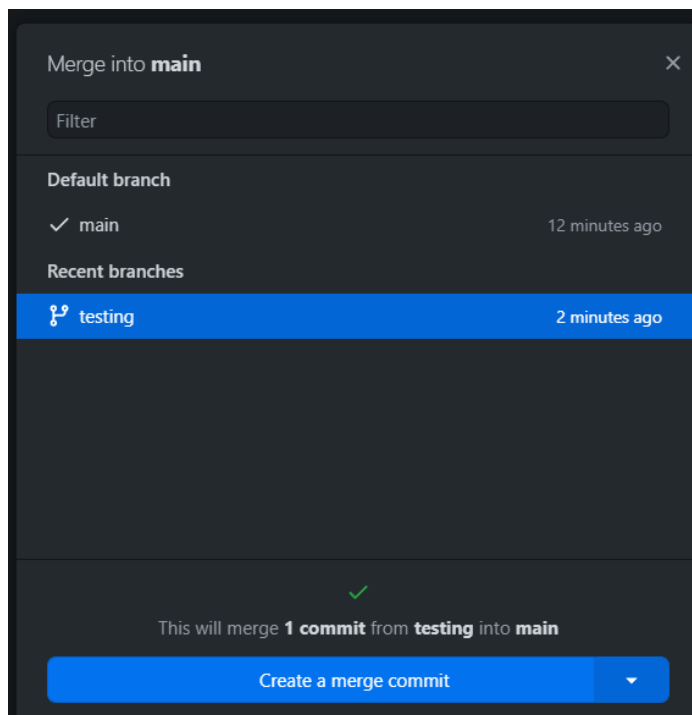

Ctrl P

Push origin

Here I made another branch called testing

Here I am merging testing into main

Here I am adding a collaborator to my repository called Bingus
